

## Features of Bank Easy:

### ✔ Seamless Bank Statement Import

Bid farewell to manual work! Bank Easy automatically imports bank statements from Bank FTP servers or cloud storage, saving you time and effort.

### ✔ Automated Statement Reconciliation

Reconcile with ease! Set up periodic background reconciliations or do it manually, ensuring up-to-date balances and accurate financial records.

### ✔ Intelligent Transaction Mapping

Match transactions effortlessly! Bank Easy allows you to create mapping rules to align system and statement transactions, presented in a user-friendly format for easy verification.

### ✔ Automatic Reconciliation Adjustments

Balance your statements automatically! Bank Easy generates missing reconciling transactions to ensure complete accuracy.

### ✔ Real-Time Cash Overview

Stay in control of your finances! Bank Easy provides a real-time overview of actual cash availability across all bank accounts and entities, empowering smarter financial decisions.

## Your Ultimate Dynamic 365 Solution for Effortless Banking!

Tired of manual bank statement handling and tedious reconciliations? Say hello to Bank Easy - the cutting-edge Dynamic 365 product that simplifies your banking process and boosts financial efficiency!

### Why Choose Bank Easy?

#### 01 Enhanced Efficiency

Bank Easy streamlines your banking operations, minimizing manual tasks and maximizing productivity.

#### 02 Error-Free Reconciliations

Our intelligent mapping and automatic adjustments ensure error-free reconciliations, maintaining financial accuracy.

#### 03 Time Savings

Save valuable time with automated bank statement imports and reconciliations, leaving you with more time to focus on strategic tasks.

#### 04 Comprehensive Financial Insights

Gain a clear view of your cash flow with real-time overviews, aiding better financial planning and decision-making.

#### 05 Seamless Integration

Bank Easy effortlessly integrates with Dynamic 365, providing a seamless user experience within your existing ecosystem.
